International Conference on AI and Computing Innovation 2026 (ICAICI)

Saturday 9 May 2026 - Saturday 9 May 2026

Kuala Lampur

Scientific Programme

The International Conference on AI and Computing Innovation is a premier forum for high-quality, peer-reviewed research in artificial intelligence and advanced computing, bridging theory with real-world applications. It brings together researchers, industry experts, and practitioners through keynote talks, workshops, and technical sessions in a flexible hybrid format. Participants gain global visibility, meaningful networking opportunities, and insight into the latest AI innovations shaping the future.

AI & Machine Learning

Deep Learning
Large Language Models (LLMs)
Foundation Models
Federated and Distributed Learning
Agents and Multi-agent Systems
Explainable AI
Causal AI and Reasoning
Computational Optimization
Swarm Intelligence
Sustainable AI
